Victoria Fanibi

Victoria is an Associate at Cityfi based in Washington, DC. Victoria is focused on equity and technology's role in urban planning and community development. She has dedicated her career to making cities more livable and lovable, and has extensive experience in sustainable land use, community planning, federal program management, and business development.

Before Cityfi, Victoria worked at Partner Forces providing mission support to the Federal Emergency Management Agency (FEMA), managing the implementation of a national security grant program. She guided senior FEMA leadership in several ways, including through the development of a department-wide Standard Operating Procedures (SOP).

Victoria also served as a proposal manager at StreetLight Data, Inc., a transportation analytics firm, where she was responsible for close to $10M in public and private sector contracts. Her success as a proposal manager is deeply rooted in the research and coalition building early in her career at Smart Growth America.

At Smart Growth America, she led an 80+ member developer and investor coalition dedicated to expanding the construction of affordable housing nationally. She directed research on smart growth tools and generated reports on land use, transportation, and zoning.

EDUCATION

· Iowa State University, B.S. Community and Regional Planning, 2016
· Syracuse University, M.A. International Relations, 2019
